

1200 COMBINATION BRAAI (GRADE 304) STAINLESS STEEL INCL. 2.4M FLUE KIT

R34,745.00

1200 De Lux 304 Stainless Steel *COMBINATION* braai made of high grade stainless steel, brushed finish.

Grid size : Length 470mm x Width 465mm

1200mm Combination Braai (Grade 304) Stainless Steel

Traditional 1200mm Built-in combination braai which offers both wood-burning braai as well as a 2-burner gas BBQ griller made of high-grade stainless steel (304).

All braai components are made of 304 high-grade stainless steel.

1200mm built-in Combination braai made of high-grade 304 stainless steel.

Suitable for indoor as well as outdoor coastal applications.

Enjoy the best of both worlds. A traditional wood-burning South African braai as well as a 2-burner stainless steel gas griller.

The braai comes full house including flue pipe and a standard cyclone fixed cowl.

Gas connection

You will require a minimum 9kg bottle of LPG to operate the griller although we recommend a larger bottle.

Use a copper pipe to link to the gas bottle which your gas installer will provide.

We recommend you use a qualified installer for proper, safe installation.

Double door design

Double door design - top door tilts up, bottom door drops 90° to form a workbench.

Moreover, the bottom rests on specially designed strong L-brackets, doing away with the traditional double chain.

Construction

We use 2.0mm high-grade 304 stainless steel for the body and moving parts and 1.2mm for the braai doors.

The gas griller is made of 1.5mm 304 stainless steel.

A dual recessed 220V spotlights provide bright illumination on both sides.

Flue kit

A standard 2.4m flue kit made from 304 Stainless Steel is supplied with the braai.

A kit consists of 2 x 1200mm round flue pipes and a cyclone (fixed) cowl 420mm in length, together making up 2400mm.

Accessories available include - 45° & 90° offsets, extra flue pipes, ceiling plates as well as a wall support bracket.

COWL

New Cyclone Cowl is now a standard feature in all Lava Fires braais & fireplaces.

The cyclone cowl replaces the traditional bird-looking rotating cowl.

Having a more efficient design, the new cyclone cowl does not rotate and is maintenance-free.

Nevertheless, a rotating cowl is still available on a special request at an additional charge.

5 Year guarantee applicable against heat damage.

Standard Unit Includes

- V-Shape stainless steel grid
- Gas Griller, 2 burner
- 220V Downlight / Spotlight
