

900MM PATIO BRAAI ON CABINET INCLUDING FLUE

R15, 922.00

**900mm Patio Braai on cabinet with double wall for improved thermal insulation.
Including flue kit.**

900MM PATIO BRAAI ON CABINET

900mm patio braai on cabinet made with double skin wall for good thermal insulation.
Entertain you family and friends indoor or outdoor under your patio all year round.

New improved design with **round flue pipe** and smoke trap instead of rectangular flue.

The braai rests on a double-door cabinet so you can neatly store your firewood and braai tools.
We pack the braai and the cabinet separately during transportation.

Both braai and cabinet are made of mild steel sprayed in heat resistant paint, black finish.

A patio braai is a cheaper and more practical alternative to Lava's built-in braai which is
More costly in terms of installation costs.

In other words you avoid building costs such as brick work, plastering, painting or tiling.
However, keep in mind that this Patio braai requires installation because the chimney usually
Goes through the patio roof.

We therefore recommend to use a qualified installer for proper, safe and waterproof
Installation.

Construction

For the main body construction we use 2.5mm double skin wall made of mild steel with a cavity in
Between the two walls.

The cavity insulates the braai keeping the heat trapped inside the braai.

The double skin & tapered body design give the braai a refined look.

The bottom door drops down to form a working bench, supported by two L-shape clips (no chains
Used).

New Flue kit

We have redesigned the flue pipe from a single length 2400mm rectangular flue to 2 x 1200mm
Round flue.

The round flue is more user friendly to install, especially when additional 45 degree bends are
Required.

We also include a standard rotating cowl and cowl base.

Due to the exposed flue design, you may consider adding wall support brackets to firmly secure the
flue pipe against the wall.

Such brackets are not included with your braai and are optional extras.

Maintenance

As with all mild steel braais, your Patio braai needs to be maintained regularly. Depending on the
Frequency of use, we recommend you give a touch up paint annually.

Such paint is readily available at your nearest hardware shop.

WARNING!

Not suitable for outdoor use where it's exposed to direct contact with the rain.

The body is made of mild steel and it will rust. Only high grade stainless steel can be used for such Application.

Standard unit includes

- Standard Stainless Steel V-shape Grid
- Light fitting (220V Downlight/Spot light, GU10 lamp)
- Potjie Hook
- Ash Pan
- Ember maker
- Std. Cowl & Base
- 2 x ø300 x **1200mm** or 3 x ø300 x **900mm**
- Double door cabinet

Dimensions

- Overall: Width 987 mm | Depth 560 mm | Height (body + cabinet) 1755 mm
- Cabinet: H: 852 x D: 530 mm
- Braai grid: Width 670 mm x Depth 450 mm
- Flue diameter: ø300 mm (**new**)

Note: Braai unit and mounting base are packed separately for transportation purposes.
